

## 44 Corian basin

Corian is a hard-wearing mixture of natural minerals and acrylic polymer. It's non-porous, comes in 100 colours and can be cut, moulded, routed or heat-shaped. "I'm even thinking of having a bath made in it," Kathy says. "I love the idea of there being no seams. I like the longevity of it, and the modernity of a matte finish." Avante Bathrooms sells a range of Cielo sinks made from Corian, including this bright pink one.
